Taormina Sketches

a sonographic montage

Taormina Sketches is a sonographic montage of recordings I made during a visit to Taormina, Sicily during Easter 1993. I have basically used the recordings as they are, but have done a few manipulations like fade ins and outs, "coloured" some, and added a "hand-drawn" line to others. I have tried to keep it short and condensed. I prefer listening to this piece through loudspeakers in a big room.

Taormina Sketches is a commission from the Norwegian Composer Union to the opening of NoTAM in 1993.
